## DETAILED ACTION

### *Priority*

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/497,694, filed on 03 February 2000.

### *Allowable Subject Matter*

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art, including Froberg et al. discussed below, does not specifically disclose or fairly suggest a system or method with the combination of limitations, elements and/or steps specifically recite in claims 1, 10, 19, and 20, particularly wherein an optical signal is modulated in accordance with a composite signal (comprising a main signal and a harmonic signal) to generate a plurality of pulses having a duration of twenty to one hundred picoseconds, and further wherein the optical signal is coded with information at a signal modulator, and further wherein the signal is sent to a step-index fiber.

Froberg et al. (US 5,521,738 A) generally disclose an optical transmitter (Figure 8) including a composite signal comprising a main signal and a harmonic signal (generated using frequency doubler 55 and combiner 585). Froberg et al. further disclose combining the composite signal with information (NRZ data signal 545) in the electrical domain to produce an electrical RZ data signal 570, and then coding the optical signal from laser 10 with the final electrical signal at modulator 30. However, unlike in the structure recited in the claims of the present application, Froberg do not specifically disclose an optical pulse modulator and an

optical signal modulator as recited, wherein the pulse modulator first modulates the optical signal with the composite signal to produce a plurality of pulses in the optical signal, and the signal modulator then further modulates the composite-signal modulated optical signal with information. Froberg et al. also do not specifically disclose step-index fiber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
